Experience

Mitchell's Flooring

2010

I was an assistant floor installer at Mitchell's. I learned the value of hard physical labor, which also pointed me in the right direction for what I wanted to be doing in my future (not trade work).

Debate Instructing

2011-Present

During high school up until today I have been the teacher for Lincoln-Douglas debate at my high school and/or middle school. It taught me how to instruct, how to organize, and how to lead.

Pacific Solutions

Several Periods from 2011 -Present

I have worked several different jobs for Pacific Solutions. These have ranged from development in their FileMaker Pro database, to work on their Weebly website, to custom web development linking into their database.

Education

Biola University (Crowell School of Business)

2013-2017

I will graduate from Biola University this May with a BS in Business Management, and a minor in Bible. Biola University has been a great place for me to learn from experienced business professionals about bringing quality practices and ethics into the field. I have been on the Dean's List every semester, and participated in the Startup Competition.

Skills

One of my skills is web design and development. I learned over the course of several years how to create better looking and more efficient websites through reading and through practice.

Another skill is teaching and leading. As stated in my experience, I have spent many years teaching high school and middle school-aged students in debate. This required much forethought and practice, and I have refined this skill over the years.
